

22 October 2022

Commonwealth Bank of Australia  
Credit Cards division

Re: Credit Card 4940 XXXX XXXX XXXX closure request

Thank you for your banking services over the years, however you may want to know why the closure? especially when you look at my excellent repayment history and long standing records, I believe I opened this account some 15+ years ago.

Attached is an article dated 20 October 2022 from Reclaim The Net, discussing your tracking transactions and then linking transactions to a carbon footprint.

Your higher up management have made a huge miscalculation and are unaware of current events out there in the social media sphere. You see if you go woke you will go broke. Netflix is just now realising this reversing their course from a few years ago. You should do the same.

The Great Awakening is happening. We are aware of how the financial institutions and large corporations are jumping on board with the World Economic Forum for reasons such as:

1. In fear of missing the boat
2. In anticipation of the extra money to be made at our expense
3. Promises of bonuses to those who influence other decision makers

This infiltration has failed. Australians and citizens around the world are not accepting wokeness.

We will not accept your actions that are no different to communist China. I will not be told I cannot buy something this month, because I am over my quota of whatever tyrannical event you have in place. (China is doing this to it's citizens too).

You need to be aware:

1. The Great Reset will fail miserably
2. Climate Change, as part of the communist orientated The Great Reset, is a totally fake propaganda narrative, and pushing this carbon neutral garbage will come back and haunt YOUR Company

I love protecting the environment, but Climate Change is nothing but a money making scam for you and all the heavyweights, which is the only reason why you go along with this crap.

Anyone with a set of brains would know that CO2 is good for the earth. Just look at greenhouses as one example.

This is all provable when you do the research. Just don't research with Google, Bing nor Duck Duck Go as those companies are part of the problem – they are part of The Great Reset / WEF mob and hide the truth. Gaslighting the public is finished.

Regards *David Ashton*

PS I know you will not care when reading this, but you will down the track when most Aussies have woken up. I decided to warn you in advance with this letter as part of my role, and it is up to you to be smarter about this. But I doubt you will, my job to warn you is done.
