WHERE HOPE FINALLY MADE A COMEBACK

"How Dare You!" - Five Years Ago Today, Climate Change Hoaxer Greta Thunberg Said the World Would End

By Jim Hoft Jun. 21, 2023 10:45 am 623 Comments

Today marks the anniversary of a doomsday prediction made by then-15-year-old climate change hoaxer Greta Thunberg.

On June 21, 2018, she made a bold claim on Twitter, stating that humanity had a narrow five-year window to stop the use of fossil fuels or face inevitable extinction.

"A top climate scientist is warning that climate change will wipe out all of humanity unless we stop using fossil fuels over the next five years."

As Banks Fail and Americans Scramble to Protect Retirement Accounts With Physical Gold and Silver, A Faith-Based Company Shows Them How

Thunberg shared a [now-deleted Grit Post article](#) by Scott Alden citing a prediction from James Anderson, a professor of atmospheric chemistry at Harvard University, titled, "Top Climate Scientist: Humans Will Go Extinct if We Don't Fix Climate Change by 2023."

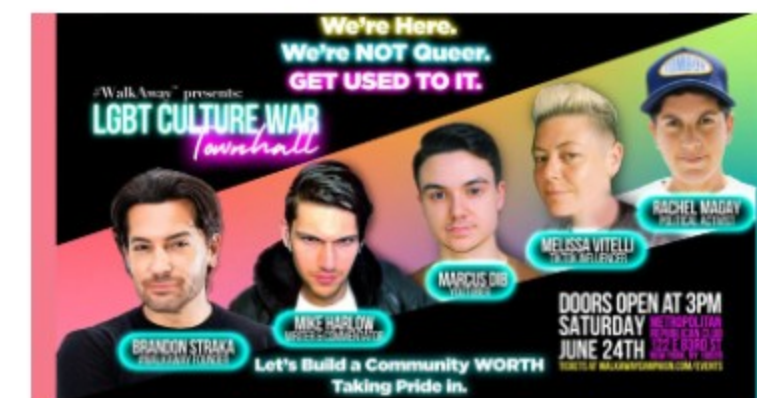

The article was shared 12.5k before it was deleted.

In a recent speech at the University of Chicago, James Anderson – a professor of atmospheric chemistry at Harvard University – warned that climate change is drastically pushing Earth back to the Eocene Epoch from 33 million BCE, when there was no ice on either pole. Anderson says current pollution levels have already catastrophically depleted atmospheric ozone levels, which absorb 98 percent of ultraviolet rays, to levels not seen in 12 million years.

Anderson's assessment of humanity's timeline for action is likely accurate, given that his diagnosis and discovery of Antarctica's ozone holes led to the Montreal Protocol of 1987. Anderson's research was recognized by the United Nations in September of 1997. He subsequently received the United Nations Vienna Convention Award for Protection of the Ozone Layer in 2005, and has been recognized by numerous universities and academic bodies for his research.

Anderson's prediction of Arctic sea ice disappearing by 2022 may be closer to reality than a lot of us would hope. In 2016, University of Reading professor Ed Hawkins compiled global temperature data dating back to 1850, prior to the Industrial Revolution of the early 20th century and the oil boom, and turning the data into a time-lapse GIF. The most alarming part of the data showed that temperatures began rising exponentially faster at the start of the 21st century and show no signs of slowing down.

As the mainstream media repeatedly fails and loses public trust, TGP has continued to offer accurate and timely reporting for almost two decades. Visit [TGP FactCheck](#) to see how we get it right.

Why would anyone believe a child on the matter?
The fact that we even know her name shows that it's been one big publicity stunt.

Greta's clown-show is no different than al gore's clown show. Both are hoaxers, but al gore's circus steals tax payer money in their act.

Climate alarmists are insane. They pervert the science so a hand full of the alarmists like Al Gore can get rich peddling this non-sense. And the average democrat eats this lie up.

Climate alarmists are mostly in colleges and universities and they know where their funding comes from and what they need to be talking about to keep the funding coming.

All western leaders bowed down to this puppet as they are in on the con.

One leader was asked about what he thinks about Greta Thunberg and her apocalyptic predictions.

"I think Greta should finish school before telling adults what to do"

Vladimir Putin.

👍 28 🗨️ 0 Reply • Share >

Itsaboutchoice → Richard Turpin
5 days ago

as they are in on the con.

What is "the con"?

The Green deals are being used to destroy Western civilizations, our "leaders" House/Senate/ex-presidents support it - by design (WEF)

👍 8 🗨️ 0 Reply • Share >

Rocky Balboa → Richard Turpin
5 days ago

The West doesn't have any leaders, just high price prostitutes. How else can you explain the worldwide COVID lock down.

👍 1 🗨️ 0 Reply • Share >
